Director's Statement

Top Oilfield's strength is derived from its technically qualified and highly experienced personnel. Our assurance is that EVERY piece of equipment that leaves Top Oilfield's workshops has been overhauled to the highest industry standards, tested and will perform to its design specifications.

One Stop Shop

Top Oilfield offers a 'one-stop-shop' concept, whereby drilling equipment, engines, electrical work and steel fabrication work are all undertaken in-house, by our own personnel. This means that we retain full control over all aspects of the projects we are commissioned to do.

In addition, the savings we make (by not sub-contracting work) are passed on to our customers, making Top Oilfield the most competitive service provider in the region.

Our vision remains the same as it was when the company was formed over fifteen years ago; which is; to provide our clients with expert, high quality and cost effective support.

Quality

Top Oilfield's workforce is highly motivated and fully committed to quality production techniques which meet or exceed the industry standards. In evidence of this commitment, the company was awarded API licences 16D (accumulator control units) 4F (crown block assemblies) and 7K (pumps and draw works).

Complete Land Rig Refurbishment

This year (to date) we have successfully completed the refurbishment of five land rigs at our Hamriyah Free Zone rig up yard. The projects were completed on time and within budget. With two further rig refurbishment projects scheduled to be completed before year end, Top Oilfield has once again demonstrated its commitment, expertise and ability to deliver.

Marine Division

Top Oilfield has recently acquired port side facilities in order to undertake the refurbishment and upgrade of a variety of offshore vessels, including jack ups, drill barges and lift barges. Our capabilities to successfully complete such work have been well proven in the past, and we are confident that we will prove to be a viable alternative to those already offering similar services in our operating region.

Profile

Quality, Experience, Client satisfaction

TOP OILFIELD INDUSTRIES is a leader in the field of land rig refurbishment, Oilfield drilling equipment manufacture, repair, overhaul and modification for Petroleum, Petrochemical and Natural gas industries. Our services extend to cover drilling equipment and associated parts supply/rental and the supply, overhaul and repair of industrial diesel engines.

Our U.A.E locations in Hamriya free zone Phase I and Phase 2, Sharjah are geographically central to the region and therefore ideally positioned to service the needs of Drilling contractors operating in the Middle East, Africa and Asia.

Established in 1995, Top Oilfield has achieved an impeccable record of oilfield equipment refurbishment. Consistently producing work of the highest quality in a timely and cost effective manner.

Our core services are:

- Land Rig Manufacture & Refurbishment
- Land rig new build rig up and commissioning
- Repair, overhaul and packaging of oilfield equipment
- Engine zero hour re-builds and repairs
- Accumulator control unit major overhaul, repair and modification
- Fabrication of complete mud systems
- Manufacture, overhaul and repair of cement units
- Drilling equipment supply and rental

Our 60,000 square meters of facilities comprise drilling equipment repair workshops, fabrication yards, rig up and commissioning yards, engine workshops, management offices and storage areas.

About Us

The Company was originally formed in 1995 and offers a repair, overhaul and procurement facility for Drilling Contractors operating in the Middle East. The Company has enjoyed steady growth over the years by providing expert, reliable and cost-effective service.

Top Oilfield is now firmly established as a market leader in the region and in order to keep pace with the needs of its clients, has recently embarked upon an ambitious expansion program.

Always committed to ensuring that our production is of the highest quality, Top Oilfield will continue to respond immediately and expertly to ensure that the interests of our Clients are always our top priority.

We are managed by industry professionals whose collective experience provides our clients with a unique level of service, offering specialist support 24x7 all year.

TOP OILFIELD
INDUSTRIES LIMITED FZC

Vision

Our ambition is to strengthen our position as the leader in the oilfield engineering arena in the UAE. We aim to grow in terms of both a wider client base as well as higher levels of quality service and products. Our vision is to offer a diverse portfolio of services carefully selected and continually improved to provide materials suitable to meet the harsh and rigorous conditions of an offshore installation. We see ourselves meeting the challenges of an evolving industry without compromising on the quality and efficiency of our services to our clients.

Mission

We aim to exceed our client's expectations in service, quality, delivery and cost through continuous improvement and customer interaction.

Marine Division

As a specialized division of the Company; Top Oilfield 'Marine' provides expert refurbishment services for Offshore Drilling Vessels for Operators who are looking for high quality, cost effective and timely rig refurbishments.

We offer a complete 'One-Stop-Shop' concept refurbishment service, whereby all aspects of the projects are carried out by our own personnel.

Engineering: Highly qualified Marine, Mechanical and Design Engineers using the latest 'AUTOCAD' engineering software are available and dedicated to providing the highest levels of support for refurbishment projects.

Mechanical/Electrical: Top Oilfield is the only regional service provider that carries out 100% of repair and refurbishment projects, in-house by our own qualified and highly experienced personnel. As an API licensed facility, you can be assured that all work undertaken is done so to the highest industry standards and once reinstalled, all equipment is guaranteed to perform to its original design specifications.

Steel Fabrication: Working closely with our Mechanical Engineers and Project Management staff and with the support of Top Oilfield's fabrication yards and workshops, our crews undertake modifications, repairs and upgrades to the highest possible Industry standards and on time.

"Our entire workforce is highly motivated and committed to producing work to the highest quality standard". Top Oilfield personnel receive incentives which are based upon the **quality not the quantity** of the work they produce.

Company activities

Company activities - From supply to service

Top Oilfield Industries has a wide range of activities and operations including supply, service, and maintenance of equipment to design, engineering and fabrication.

Rig manufacturing and modification

We undertake Rebuilds, Design & Engineering of rigs. Top Oilfield Industry Facilities in Sharjah are 60,000 sq.meters of rig up yard, workshops, welding facilities, fabrication & testing facilities where we can perform inspection of drilling equipment , mast / sub base inspection and repairs (API certified where required).

We have a full project team to oversee the complete refurbishment of your Equipment or rig package regardless of size. Top Oilfield Industries has onsite Engineers, draftsmen, project managers, workshop manager, mechanics, electricians and full yard staff to support each project.

Drilling Equipment

We undertake the repair, overhaul and packaging of drilling equipment such as Drawworks, mud pumps, rotary and electric brakes etc. We also provide generator rewinds as well as SCR and electrical systems installations and repair.

We conduct inspection of drilling equipment, mast, sub base inspection and repairs. (API certificate where required)

Packaging Engines

Our highly qualified and skilled mechanics are renowned in the region for the repair and overhaul of industrial diesel engines. We undertake repair overhaul and packaging of engines. We offer IPD and Genuine Cat parts, crude oil filter systems and centrifuges, high quality exhaust blankets and turbo covers. All zero hour overhauled engines come with a comprehensive QAQC package and third party load certificates. We modify engines to suit zone 1 application.

We provide onsite support for offshore repairs and in frame refurbishment. We can offer marine and industrial conversions and some engines on exchange basis - Caterpillar and Detroit only.

BOP Control Systems

TOP OILFIELD INDUSTRIES are the specialist on a BOP Control Systems & control panel repair/rebuild in the Middle East. We can perform a complete inspection/repair/rebuild of your existing unit or build you a new unit as per API 16 D specification or as per client provided specification.

A QA/QC documentation package shall be furnished to the client on completion of refurbishment of the unit. The documentation package shall comprise of Inspection reports, MPI reports, mill certificates where required, welders and Inspectors qualification certificates (where required) and complete digital photographic record of disassembly and assembly.

Hydraulic services

From the repair, overhaul, modification and manufacture of Accumulator Control Units, Cementing Unit controls to onsite hydraulic hose installation, Top Oilfield's technicians are qualified and experienced in the trouble shooting, repair and installation of complex hydraulic systems and their components.

Top Oilfield through its network of specialist suppliers, can source hydraulic parts and equipment used by Drilling Contractors and service companies.

Fabrication

Fabrication activities are executed in accordance with Top Oilfield Industries operating procedures and project-specific plans and instructions that ensure supplied products meet or exceed client's specifications and delivery schedules.

Throughout the fabrication process, qualified Top Oilfield Industries supervisors / QC Inspectors monitor fabrication works to ensure adherence to specifications and procedures. Inspection and testing are executed in accordance with approved Inspection & Testing plans which indicate inspection requirements throughout the fabrication process, including information on acceptance criteria, QC documents required by the customer and inspection procedures to be used.

Engineering and Design

Top Oilfield provides highly qualified and experienced personnel to complete all mechanical, structural, electrical and instrumentation design plus detailed engineering necessary to meet project requirements. All engineering activities are carried out to documented quality assurance procedures. All elements of design are reviewed for adequacy, correctness and compatibility with design documents prepared by other engineering disciplines.

Equipment and Manpower Supply

Top Oilfield Industries also offers drilling equipment for sale and/or rental when available. All offered equipment will have been fully inspected by a qualified Top Oilfield Industries serviceman.

We have an excellent team for sourcing your spare parts needs for nearly all drilling equipment in today's market. These parts are alternative to the OEM but meet or exceed OEM specifications. We source parts worldwide to ensure that deliveries are met without sacrificing price or quality.

Top Oilfield Industries offers manpower supply of mechanics and electricians who are available to travel to most customer locations to perform on-site inspections and repairs.

RESISTIVE LOAD BANK

This new variable load bank system is the top of its class, offering variation loads for long load durations up to a maximum capacity of 2500Kw at 600 VAC, 3Ph and 60Hz. The system provides a protected and safe means of applying incremental resistance through the use of load elements, logic control, breakers and governor module. The system is compact and can be easily located on land, key side and offshore locations

handled with the use of a forklift or crane. Pending on

generator capacity, load sharing capabilities can be achieved through the SCR or control module. One operator and one assistant would be provided with the system to ensure hook up and smooth running of operations. Commissioning sheets are available and would encourage the presence of a 3rd party class representation such as ABS or DNV. This can also be arranged if required.

DYNAMOMETER

This new Dynamometer system is now located in our Hamriyah Free Zone facilities set up indoors, in an AC controlled environment, making it the only system of its kind in the region. The system offers variable load capacity to a maximum continuous HP rating of 2,700. The PowerNet software features detailed load curve read outs and comprehensive details of all engine parameters. As part of our standard service, every engine overhauled by Top Oilfield's professional rebuild

team, will include the dynamometer load test witnessed by the client or appointed representative. As an alternative, we will offer this system to be available to clients whom would like to load test their engines as a 3rd party option. Collection and return of engines or generator sets can be arranged if required. Commissioning sheets are available and would encourage the presence of a 3rd party class representation such as ABS or DNV. This can also be arranged if required.

INDUSTRIES LIMITED FZC

Clients and Projects

The following examples constitute a small selection of the work TOP OILFIELD INDUSTRIES carried out in last several years for contractors and operators in the region. The examples appear in no particular order of importance nor according to any other criteria.

- Saipem - Zero Hour Overhaul of Caterpillar Engines, refurbish Drawworks and Mud pumps.
- KCA Deutag - Refurbishment of two 1000 HP work over Rigs.
- Weatherford - Major upgrading and commissioning of Two, 2000HP Rigs.
- Halliburton - Fabrication of 120BBL Batchmixers.
- Nabors - Zero Hour Overhauling of Caterpillar D3512TA 6.25" bore engines.
- Petrofac - Manufacture of BOP Control Units in Accordance with API 16D.
- Nabors - Refurbishment of E2000 and 1625 Drawworks.
- Cudd - Manufacture of BOP Control Units in Accordance with API 16D.
- Schlumberger - Supply of Turn Key Pump package (CAT 3412/Priming a 800 HP Pump)
- Hercules - Zero Hour Overhaul of Caterpillar D399 Engines.
- Ensco - Inspection and Refurbishment of BOP Control Unit.
- Saipem - Onsite Refurbishment of Travelling Equipment and A1700 Mud Pumps.
- Oilserv - Manufacture of Truck Mounted Cementing Unit.
- Noble Drilling Intl. - Inspection and Overhaul of Drilling Equipment.
- Blue Ocean - Fabrication of 100BBL Batchmixers and Cement Units.
- Hercules - Overhaul of 1320 Drawworks and 12 P 160 Mud Pump.
- Dalma - Refurbishment of cardwell KB-700 carrier rig.

The manufacturer's names (National, Oilwell, Koomey, Emsco, CAT, Kenworth) used herein are solely for identification purposes and are not intended to cause confusion as to the source, sponsorship or quality of the service and parts supplied by TOP OILFIELD INDUSTRIES LIMITED FZC. The original manufacturers named above and throughout this catalog do not sponsor, promote, warranty or endorse TOP OILFIELD INDUSTRIES LIMITED FZC products.

Health, Safety & Environment

COMPANY HSE POLICY

It is the policy of TOP OILFIELD INDUSTRIES LTD. to conduct its activities / operations in a manner which is designed to ensure the Health, Safety and Welfare of all employees, contractors and others who may be affected by its work activities, and to give regard to the preservation of the environment, particularly in its operational locations. This will be achieved by minimizing work place risks, which may give rise to accidents/injuries or occupationally-related ill health. We are committed to ensuring good standards of HSE performance and we have allocated the provision of adequate resources to operate HSE as part of the overall business program.

GENERAL HSE - TOP OILFIELD WILL:

- Ensure compliance with all the HSE-related legislation, both local and international; where laws do not exist, standards and guidelines will be observed.
- Promote a positive HSE culture which holds management accountable for continued good standards of HSE in the workplace.
- Ensure that contractors and others related to our work activities follow the same standards.
- Ensure the provision of training for all employees commensurate with their work activities.
- Ensure that the organizational emergency procedures are maintained to reflect its activities and operations.
- Develop Risk Management programs to ensure that identified risks are reduced and controlled.
- Monitor and audit HSE and communicate the findings throughout the organization.

SAFETY - TOP OILFIELD WILL:

- Ensure that the facility is designed safely, its work activities and operations are conducted in a safe manner with systematic examination and assessment of plant, equipment, and procedures to minimize risks to employees, property, and the community at large.

HEALTH - TOP OILFIELD WILL:

- Conduct its activities to ensure that all health risks to employees, contractors and others are minimized. Where occupational health risks are identified the provision of Health Surveillance and Monitoring Procedures will be initiated.
- Ensure the promotion of health-related issues together with a system for discussing occupational health concerns.

ENVIRONMENT - TOP OILFIELD WILL:

- Identify the risk of Pollution from any of its activities, products or services which then be either eliminated or controlled and, where practicable, meet or exceed all regulatory requirements.
- Reduce waste to the lowest practicable level and ensure the responsible disposal of waste created or received.
- Minimize unnecessary use of materials, resources, and energy.
- Help preserve the environment in the immediate area of the organizational operations/activities.
